

# MEDAE

## A multi-actor network on agroecology in the Mediterranean

### OUR VISION

Climate change, drought, pressure on natural resources and urbanization are current and future challenges affecting Mediterranean agriculture, which translates into a need to transform food systems. The MEDAE network believes that the principles of agroecology can provide diverse and multi-dimensional responses in favour of sustainable food systems across the Mediterranean.

### Who are we?

We are a network of organizations coming from academic and research background along with civil society, government bodies, the private sector and many others.

With its diversity of sectors and activities, MEDAE members represent actors at the local, national, and regional scale who are committed to an agroecological transition in the Mediterranean!

*The MEDAE network is hosted by the CIHEAM-IAMM and is currently animated by the CARI (Centre d'Actions et de Réalisations Internationales)*

# OUR GOALS

Build a unique community of professionals committed to the agroecological transition in the Mediterranean!

- Capacity building
- International Collaborations
- Exchanges of knowledge and know-how

Carry a strong, unified voice for those involved in the agroecological transition in the Mediterranean!

- Multi-actor concertation
- Scientific and political advocacy
- Representation of agroecology stakeholders in the Mediterranean
